DETAILED ACTION***Drawings***

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Response to Applicant's Amendments

This Office Action is responsive to the amendment filed on 5/1/07. Claims 1-20 are pending. Claims 1-9 and 17 have been amended. Applicant's remarks filed in the 5/1/07 request have been fully considered and are persuasive, thus the former 35 USC 103 rejections have been overcome. However, upon further consideration, claims 1 and 6-8 are rejected under new grounds of rejections, and thus claims 1 and 6-8 are finally rejected for the reasons of record.

Examiner's Statement for Reasons of Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: claims 9-20 recite, inter alia, claim limitations for both a bottom wall and lid pivotally attached to the side walls of the dishwasher rack; the Fox reference (taught herein) fails to anticipate or suggest fairly this feature of Applicant's invention.

Claims 2-5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Fox (US Patent No. 2,343,657).

Fox teaches a drying rack when not in use may be caused to assume a non-operative condition where the rack occupies the minimum of space by being collapsible

(col. 1, lines 29-31). The drying rack includes top and bottom walls 12 (back, front wall), left trackway 1 and right supporting member 3 (side walls), and a trackway 1a, 1b (projecting slide portion). Brackets 2, 4, are connectable to a joist J, which is fully capable of being connected to a dishwasher rack. It is well settled that the intended use of a claimed apparatus is not germane to the issue of the patentability of the claimed structure. If the prior art structure is capable of performing the claimed use then it meets the claim. *In re Casey*, 152 USPQ 235, 238 (CCPA 1967); *In re Otto*, 136 USPA 459 (CPA 1963). Joists are well-known in the art to serve as a connecting means, the joist K of Fox is wholly capable of being attached to a dishwasher rack.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over obvious over Fox further in view of Welch (US Patent No. 5,605,236).

Fox teaches the claimed invention except fails to recite the material composition of the drying rack to be polypropylene. Polypropylene is a known plastic, Welch teaches a dishwasher rack comprised of plastic. Plastic is a well-known material in the art for use in dishwashers because it is sturdy, resilient, waterproof, readily available and cost-efficient.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

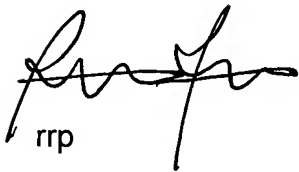

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
